MEMORANDA.

Trade.—The Oversea imports during August were valued at £4,214,401, and show an increase of £2,973,616, or over 239 per cent., as compared with the corresponding month of last year. The total for two months, July and August, 1918, was £6,843,838, an increase of £3,296,541, or over 92 per cent., in comparison with the corresponding period in 1917.

The Oversea exports during August amounted to £4,366,374, being an increase of £2,435,197, or over 126 per cent., as compared with the corresponding month of last year. For the two months, July and August, 1918, there was an increase of £1,927,080, or over 37 per cent. compared with the same period for 1917.

Imports at Sydney.—Excluding the value of the imports from State ports, the articles imported at the port of Sydney, in July were valued at £5,869,699. The following is a summary of the imports during the month :—

					Weight and Measurement.	Value.
					tons.	£
Imports Oversea	94,437	4,125,388
„ Interstate	50,846	1,744,311
„ From State ports	125,353	Not available.
Transshipments—						
Oversea...	25,436	„
Interstate	19,628	„
To State ports	6,115	„

A few special articles, denoted by number in the detailed table within, have been converted into weight or measurement, and are included in the above statement. During the two months ended August, 1918, the Oversea imports were valued at £6,723,627, and the Interstate imports at £3,826,818, the total of the two being £10,550,445.

Public Finances.—The Public Accounts for August show that the net revenue for the month was £1,687,648, or £434,119 more than in August of last year—an increase of 34.6 per cent. During the two months ended 31st August, the revenue was £3,315,273, being £704,226, or nearly 27 per cent. more than the corresponding period of the last financial year.

Principal increases during the two months were—				£
From Commonwealth Returns	2,604
Taxation	44,430
Railways and Tramways	611,673
Sydney Harbour Trust	18,953
Water and Sewerage Rates	13,728

Principal decreases during the same period were—				
From Country Towns W.S. and S. Interest	3,401
Public Lands	8,627

The expenditure during August was £1,720,427, an increase of £88,069, or 5·4 per cent., as compared with August of last year. During the two months ended 31st August, the expenditure was £3,452,777, being £163,359, or nearly 5 per cent. more than in 1917-18.

Principal increases during the two months were—				£
Government Departments	63,456
Business Undertakings	92,622
Interest	7,281

On the 31st August, 1918, the Consolidated Revenue Account was in debit to the amount of £723,717.

Savings Banks.—The latest returns show that at the 30th June, 1918, there were 920,337 depositors, having £43,039,012 on deposit. This shows an increase of £2,202,265 in deposits during the year. The average amount on deposit was nearly £47 per depositor and over £22 per inhabitant.

Gold Production—The gold yield during August, 1918, was 5,270 oz. crude, equal to 4,978 oz. fine, valued at £21,143, and showed an increase of 102 oz. fine, and £433 in value, compared with August of last year. The value of the gold produced during the eight months was £236,071, and showed an increase of 426 oz. fine, and £1,810 in value, in the figures for the corresponding period of last year.

Cost of Living, Sydney.—From the information collected each month (see Table 56) as to the retail prices in Sydney of food and groceries, it appears that in August, 1918, prices were 31·1 per cent. higher than in July, 1914; 5·1 per cent. lower than in August, 1917; and 2·5 per cent. lower than in the preceding month, July, 1918.

Meat, which is included in the results quoted above, shows prices in August, 1918, 47·1 per cent. higher than in July, 1914; 19·5 per cent. cheaper than in August, 1917; and 8·5 per cent. lower than in July, 1918.

The following is a statement of the price levels since July, 1914, the levels for which were taken as base, and called 100 :—

The notable decrease in the price of meat was the result of the fixing of maximum prices by the Commonwealth Government.

Increased prices ruled for potatoes, tea, and jam, while bacon, ham, oatmeal, and eggs declined in price.

Meteorology.—During August good rains, mostly of a tropical nature, were recorded, so that the general average was exceeded over practically the whole of the State. A number of unimportant centres, including the Blue Mountains, and parts of the coastal districts, Western Division and Southern Tableland, were below normal, but the beneficial character of the rain generally received, which was associated with mild to warm temperatures, may be gauged from the records of the North West plain, North West, Central West, and South West slopes and Central Tableland, where the total falls ranged from $2\frac{1}{2}$ to 6 inches. Snow was reported from a few places on the Southern Tableland during the month, and hail occurred at isolated places; periods of squally southerly winds were experienced, principally on the North Coast.

Vital Statistics—Sydney and Suburbs—August, 1918.—The births registered numbered 1,682, equal to 25·97 per 1,000 of population per annum; of the total, 850 were males and 832 females. The rate is 9·7 per cent. below the average of the previous five years.

The deaths numbered 690, namely, 338 males and 352 females. The mortality rate of 10·65 per 1,000 of population per annum, is 8·3 per cent below the average of the previous five years. The deaths were below the average in all age-groups.

The infantile mortality was 60·6 per 1,000 births, and is 0·8 per cent. below the average for the month of August for the previous five years.

New Buildings—Metropolis.—According to returns supplied by the several Town Clerks, there were erected, in the Metropolitan area, during August, 447 new buildings, as compared with 351 in August, 1917.

The total for the eight months, January to August, was 3,389, as compared with 3,523 during the corresponding period of 1917.

Land Selections.—During August, 115 applications were made for 69,679 acres under the Crown Land Act; and 78,183 acres, representing 99 blocks, were gazetted for residential settlement, which includes areas set apart for returned soldiers. Since the beginning of the year the number of applications has been 665, and the area applied for 503,582 acres. The original area gazetted for residential settlement since the 1st January is 570,879 acres, representing 687 blocks.

The population includes Aborigines of full-blood, viz., 2,012, of whom 1,152 are males and 860 females. (—) Denotes decrease.

* The population since 1st January, 1911, is exclusive of Federal Capital Area, the population of which at the Census on 2nd April was 1,724, of whom 997 were males and 727 females.

* Since the 25th March, 1916, the official f.o.b. price of wheat for flour for home consumption has been 4s. 10½d. per bushel. This includes 3½d. handling and commission charges; but city millers, handling grain for their own mills, obtain it for 1½d. per bushel less than the f.o.b. price, so that since that date the price of wheat for flour for home consumption has been 4s. 9d. per bushel (on trucks), Sydney. † Amended since last issue.

(1) The exports in 1916-17 include articles produced in other States of Australia. Since 1st January, 1912, the Federal Customs Department has classified all goods produced in the Commonwealth simply as "Australian," without distinguishing, as formerly, the particular State where they were produced. (2) Includes cheese.

(3) For 1861 Gross Revenue and Expenditure are shown. Particulars for 1901 and 1911 are for the year ended 30th June following. Transfers to Public Works Fund and Closer Settlement Fund are excluded in 1911 and 1916-17. (4) Subsequent to 1881 the particulars are for the year ended 30th June following. (5) 1891 and 1901 include telephone wire; 1911 is exclusive of mileage of wire erected for railways. (6) 1901 and following years are for the December quarter.

No. 65.—New South Wales Wheat Areas, 1918.

The collection of particulars relating to the area sown with wheat during the current season has been unavoidably delayed, but sufficient data have been received to enable a fair estimate to be made.

Owing mainly to the dryness during the ploughing and sowing seasons, and, in a smaller degree, to the difficulties arising out of the disposal of the crop, it was anticipated earlier in the year that the wheat area would be less by 20 to 25 per cent. than the area sown last season. Also there was a considerable amount of uneasiness amongst the wheat growers as to the price which would be received for this season's wheat. The compilation shows that the decrease, although considerable, is not so large as expected, but it amounts to 626,100 acres, or about 16½ per cent. Possibly the announcement that the Government intended to guarantee 4s. per bushel to farmers over the weighbridge at local railway stations, allayed the fears of the farmers and induced a number of them to crop more heavily than they intended.

The area under wheat has been restricted throughout the whole of the wheat districts, the decrease ranging from 40 per cent. in the Southern Tableland division (where the area is not large) to 14 per cent. in Riverina, and 5 per cent. in the division of the Central Plain, where the areas involved are 1,102,840 acres and 532,960 acres respectively. In the northern portion of the State the decrease in area amounts to 102,950 acres, or 26 per cent., but in the central and southern districts, where the rainfall was more opportune, the decreases, although greater in the aggregate, are proportionately much smaller. In the central districts, the decrease amounts to 180,320 acres, or 13·6 per cent., and in the southern districts to 334,760 acres, or 16 per cent.

The decrease in wheat area is due, not only to the cultivation of smaller areas on the various holdings, but also to the fact that, whereas in 1917 wheat was grown on about 19,000 holdings, the area sown for the current season has been confined to 17,000 holdings, a decrease of 2,000 holdings, which, it is presumed, are now devoted solely to pastoral pursuits.

The winter rainfall was very deficient, especially in the northern and north-western portions of the State, and pastoralists and agriculturists alike passed through a very anxious period. The droughty conditions were not broken absolutely until August, during which month the rainfall experienced over the greater portion of the State was above the average, and was very beneficial, associated as it was with mild to warm temperatures. The subsequent dry weather has caused much anxiety to wheatgrowers, and the outlook for the approaching harvest is unfavourable. Rain is needed urgently to save a large proportion of the crops, especially those intended for grain; and, probably, a larger area will be cut for hay and for greenfood. The absence of rainfall during October appears to preclude the possibility of satisfactory yields of either grain or hay.

As in the previous year, the unsettled state of the wheat market, and the difficulty in selling the crop on account of the war, contributed materially to the reduction in area, whilst in a large number of instances the comparatively higher prices ruling for wool and stock generally induced farmers to abandon wheatgrowing temporarily in favour of pastoral pursuits.

The following table gives a summary of the areas in each of the important divisions in comparison with the actual returns for the previous year :—

* 41,400 acres were fed-off, the details for each division being included in the total column. † Inclusive of areas which failed entirely, viz., 124,100 acres for grain and 1,600 acres for hay.

On the basis of the returns received, it appears that the area for hay will be about 383,530 acres, or nearly 12 per cent. of the total area sown with wheat.

It is estimated that 2,811,870 acres will be reserved for grain. Owing to the continuance of the dry weather, it is probable that this area will be reduced considerably, as it is feared that a much larger area than anticipated will be cut for hay or be fed-off, etc. Even the area for grain as shown in the above table is considerably below the grain area of each of the three previous seasons, and is only 54,000 acres in excess of the area harvested for grain in the drought season of 1914-15.

Viewing the situation from the standpoint of total areas under wheat cultivation as shown in the final column below, it is apparent that the cultivation is less than in any of the previous five seasons.

The wheat crops generally suffered from the absence of moisture in the early stages, and up to August gave little indication of yielding a payable crop, except in the Southern districts.

The subjoined table shows the progress made in wheat cultivation since 1907-8 :—

The following information also has been prepared relating to the Wheat Areas during 1918, and the table shows the number of holdings on which wheat has been cultivated, and the areas of new and fallowed land sown, in the various divisions of the State :—

IRRIGATION FARMING IN NEW SOUTH WALES.

THE GREAT 'MURRUMBIDGEE' IRRIGATION SCHEME.

(A STATE ENTERPRISE.)

Soils may be chosen suitable for the—

Orchardist, Dairyman, Poultryman, Pig Farmer, Bee Farmer, Vegetable Grower,
Viticulturist, Fat-Lamb Raiser, General Farmer.

LIBERAL AND PRACTICAL ASSISTANCE TO SETTLERS ON THE EASIEST OF TERMS.

Subject to such conditions as to security and terms of repayment as the Commission may think fit to impose, Settlers may obtain an advance or have payment of rent and water rates suspended. Trees and Vines may be purchased from the Commission's Nursery—Specially selected Dairy Stock are obtainable—Pedigree Stock may be hired—Railway Concessions are granted on New South Wales Railways.

(Change of policy may require alteration of terms of assistance.)

THE AREA'S FACTORIES.—No. 1 Butter Factory, Leeton.

SPECIAL ADVANTAGES.

The whole scheme is administered by the State Government, and the products are carried to market on Government-owned railways.

There is No Balloting for Land.

Instruction and demonstration in Agricultural and Irrigation methods are always available, free of cost to the settler, by experts employed by the State.

The climate of the Murrumbidgee Irrigation Areas is dry and healthy—hot in summer, which makes it suitable for drying fruit.

Water is supplied solely by gravitation (no pumping required) at a very cheap rate.

Butter, Canning, Bacon, and Cheese Factories, also a Pulping Plant have been established in connection with the Scheme.

Schools, Churches, Banks, and Stores have been established.

Applications for land are dealt with promptly.

Information on every point, including pamphlets, lithographs, and lists of lands available is obtainable from

The Secretary, Water Conservation and Irrigation Commission, Branch "C,"
39 Hunter-street, Sydney, or

The Resident Commissioner, Murrumbidgee Irrigation Areas, Leeton.
